About Our ICT-RC

Welcome to the Information and Communication Technology Resource Centre (ICT-RC). We provide a wide range of technology-related services to support educational, research and professional activities.

Our Services

1 High-Performance Computing (HPC) Services

Access to HPC Applications for computationally intensive tasks such as Weather Forecasting, Bio-informatics, Quantum Chemistry and Engineering.

2 Professional and Tailor-made Training

We provide training programs for ICT professionals on various IT related topics and also offer tailor-made training based on the specific skills or knowledge gaps identified by the organization or individuals.

3 Data Analytics, Management and Storage

We provide storage for handling large datasets generated by simulations, machine learning or other data-intensive applications.

4 Consulting Services

We offer ICT and HPC consulting services to organizations and individuals.
